GALCON

GSI - Solar or Battery Powered Web Based Irrigation

Galcon is revolutionizing the crowded space of Web Based Irrigation Controllers by bringing you GSI, the world's first Solar or Battery powered Web Based Irrigation Controller. No power? No problem. GSI eliminates the need for electricity but GSI does not let you down on features and benefits.

With GSI, there is no monthly subscription cost to manage your irrigation. Over the Air (OTA) firmware upgrades mean that the controller will always feature the latest updates without the need to visit the field to replace chips, boards or other parts and pieces.

GSI delivers a simple and easy to use online irrigation management control. Available anywhere and anytime, the

secure online irrigation management application is "cloud-based" offering access from any web connected desktop or laptop computer. Mobile Apps for Android and iOS add flexibility by giving you field based control from your connected Tablet or Smartphone.

Web Based Irrigation Control has never been easier. GSI offers a friendly online user interface that is easy to learn and simple to operate. True plug and play design means that you will not need to add parts or pieces. It also means that you will not need to complete a lengthy certification course to successfully install and operate the system.

GSI brings Two-Way communication, meaning that GSI brings Flow Sensing capabilities along with real time reactions to unexpected flow (high flow, low flow and no flow) and email notifications of field based conditions keep you informed.
