#### A Step Beyond Pressure – Reducing Water Leakage by 30%

Just over a year ago, Galcon and Mei-Carmel, Haifa's water and sewage supplier, initiated a pilot installation of Galcon's pressure reduction solution in the Haifa area. After a year of testing the solution, we are very proud to announce that Galcon's solution displayed a direct reduction of 30% in water leakages in the area where the solution was installed. The pilot was such a success that Mei-Carmel has ordered the solution for 4 additional neighborhoods, which should result in a substantial reduction in both water usage and expenses.
