## GSI Goes to China!

One of China's major municipalities in Shandong province has chosen Galcon to provide smart irrigation for their public landscape and green belt areas. The system that was selected is GSI – Galcon's web-based, centrally controlled smart irrigation system. The system will control 300 irrigation valves and some 1,000 sprinklers covering an area of 800,000 square meters (80 hectare).

The customized GSI system will use weather-based irrigation technologies to automatically adjust watering according to both changing weather conditions and various plant needs. Monitoring water flow and sending remote alerts to the control center in the event of malfunction are just some of the features that GSI will provide, enabling the Shandong Gardening Department to save between 30-50% of irrigation water use!

Sharon Ben-Basat Galcon's Regional Manager for APAC shared his pride in this achievement; "We are proud to have been chosen for this project. The GSI smart irrigation system will help Shandong save a significant amount of water, thereby facilitating the Chinese Government's ongoing efforts to protect the environment. Galcon's sees great potential in the Chinese water and irrigation sector and we are excited at the opportunity to help promote the Government's environment-friendly initiative. GSI is an integral part of Galcon's strategy to provide advanced, green solutions for smart irrigation."

## A Little about the GSI System

GSI is Galcon's revolutionary, web-based irrigation control system that was designed using cutting-edge cloud technologies to bring an affordable, smart irrigation solution with seamless connectivity. Now available in an AC version, each GSI unit can control up to 24 valves, allowing users to remotely schedule and monitor irrigation from any web-connected computer or smartphone! No matter what type of

landscape or number of stations, the GSI system will identify leaks and malfunctions, enabling significant reduction in water loss and irrigation expenses.

### **From US to Europe, through South America and back to Israel!**

Galcon has been very busy showcasing our smart irrigation solutions all around the world. Here are just some of the events we've been to

so far in this year:  
1. LIS in Los Angeles, California

2. GardenTool in Moscow, Russia

3. Technicians' Seminar in Baja, Mexico

4. The March GSI Seminar for our customers in Galcon's HQ, Israel

5. Agriculture Fertigation Seminar in Trujillo, Peru

### **Visit us in one of our Upcoming Events!**

Don't worry if you missed us at our previous, this May and June you can visit us on these upcoming events:

- NHS, Las Vegas, Nevada
- Agritech, Peru
- Technicians' Seminar, Peru
- IFTEX flower industry show , Nairobi ,Kenya
- Shanghai Int'l Garden And Landscape Design & City Construction Expo, Shanghai, China
